

Glow in the dark posters

Short description: Glow in the dark prints – delivered rolled or flat, ready to frame

Long description: Available exclusively through Prodigi, our glow in the dark posters are a truly unique print on demand option.

Designed for graphic illustrations, abstract art and typography, this specialist paper has a beautifully soft texture and clean, matte finish. The finished result is a premium, gallery-style aesthetic by day, and a glowing statement piece after dark. Want even more impact? Try our framed glow in the dark art, available in our bestselling classic and box frames.

Our advanced printing technology makes short runs easy, with no setup costs – so you can order one-off custom glow in the dark prints or scale up to larger quantities quickly. We also print up to a huge 40x80", giving you the freedom to create statement pieces without limits.

Read our setup guide on glow in the dark printing to prep your files, and note that areas defined as pure white or transparent will emit a luminous green-blue glow. To activate the effect, expose the print to around 30 minutes of bright or natural light before displaying it in a dark room. The more charge it receives, the brighter it glows, and it will gradually fade until recharged.

Choose sizes from 4x6" to 40x80". UK orders sized 200mm and under, and US and EU orders sized A4 and under, ship flat. All other sizes ship rolled.

Features:
